Subject: RE: OA meeting with EPA and UW

Hi All,

We would love to have you all attend. I understand Dick will be out of town on a research cruise (have a safe trip!) but we would love to have you Simone and Nina, and whoever else you think would be appropriate. Jan Newton and Terrie Klinger will be joining us, as well as several EPA folks from different programs. Mike Cox, our climate change coordinator, is working on an agenda, so we'll send that out for your review and will provide logistical info later as well. Please let me know if there are any specific items you would like on the agenda. Thanks so much for your willingness to come downtown to us and I look forward to seeing you soon. Have a great weekend.

Hi Jill,

I would be delighted to attend on May 11 and am available during that time. I would like to inquire if I could also bring my postdoc, as she is working on better characterizing pH variability in Washington waters, with an eye to assisting with impaired waters determination and management. She is doing this work in partnership with myself, Adrienne Sutton, Christopher Krembs (at ECY), Jan Newton, and Terrie Klinger. Please let me know if it would be appropriate to invite her as well.

All the best,
Simone Alin

Hi Jill:

I would like to join you at that meeting but, unfortunately, I will be leaving for a research cruise on that day. I suggest that you invite Nina Bednarsek and Simone Alin to join the meeting.

Regards,

Dick

Hi Dick,

We spoke at the OA and hypoxia meeting last week at the Edgewater. I talked with Jan Newton as you suggested, and EPA will be attending the meeting at the end of May. We would like to meet prior to that with Jan and Terrie and you, if possible, to talk further about our decision making processes and science needs, as well as the ongoing and upcoming research that all of you are working on. Jan and Terrie are available May 11, and we've scheduled a meeting with them at our office downtown from 9-11 am. If you are able to join us, we would love to be able to talk with you then as well. If that time isn't convenient, perhaps EPA could schedule something separately. We just wanted to have some dialogue prior to Jan's meeting to help us focus our input and participation. Please let me know if you would like to join us on the 11th, either in person or by phone, and please feel free to extend this invitation to any of your colleagues that you think should be included. Thanks so much and it was lovely to meet you and have a chance to chat last week.
